

SACHIN S

+91 9655370719 | Coimbatore, Tamil Nadu, India | sachins04815@gmail.com | [linkedin/contact-sachins](https://www.linkedin.com/in/contact-sachins) | [github/sachins-devloper](https://github.com/sachins-devloper)

SUMMARY

Software Engineer with professional experience in designing and developing scalable full-stack and AI-powered applications using Node.js, Express.js, React.js, Next.js, Python, FastAPI, MongoDB, PostgreSQL, and TypeScript. Experienced in building RESTful APIs, secure authentication and authorization (JWT/RBAC), microservice-oriented backend systems, LLM integrations, and cloud-ready applications. Skilled in API design, database optimization, performance tuning, Docker, CI/CD, Git, Agile development, and clean architecture, delivering reliable, maintainable, and production-ready software in collaborative environments.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering.
Anna University Regional Campus, Coimbatore **CGPA** - 7.5

Oct 2022 - July 2026

EXPERIENCE

AI Fullstack Developer @Glimmora International, Dubai, United Arab Emirates - Remote
Mar 2026 - Present

- Engineered and deployed 3+ AI-powered features (LLM chat, adaptive learning flows, automation pipelines) using NextJS and FastAPI, integrated with OpenAI API and prompt engineering workflows
- Architected a multi-role (admin, instructor, user) JWT-based authentication system with permission-gated REST API routes across 20+ endpoints, reducing unauthorized access incidents to zero in testing
- Designed and optimized PostgreSQL schemas with indexing, cutting average query response time by ~35%; deployed production services on DigitalOcean and AWS (EC2, S3) with Docker containers
- Set up CI/CD pipelines using GitHub Actions for automated build, test, and deployment workflows, achieving consistent zero-downtime deployments

Software Engineer Intern @Noukha Technologies, Coimbatore - On-site
Oct 2025 - Feb 2026

- Developed production-ready React Native mobile application consuming REST APIs with JWT authentication, real-time data handling, and offline-first state management
- Built a reusable UI component library (12+ components: buttons, modals, form inputs, cards), reducing feature development time by approximately 40% across 3 app screens
- Implemented authentication flows (login, registration, token refresh) with secure storage and session handling following industry security best practices
- Contributed to bug triage, code reviews, and test coverage improvements, resolving 20+ issues across 2 release cycles

PROJECTS

IntuitionX (AI-Powered Learning Platform) *Stack: React Native · NestJS · OpenAI API · LangChain · MongoDB · Redis · Tailwind CSS · Docker*

- Built an AI-powered learning platform with GPT-4o chat assistance, adaptive quiz engine, and personalized study planner — onboarded 50+ beta users; achieved 4.2/5 satisfaction score in pilot testing
- Implemented RAG (Retrieval Augmented Generation) pipeline using LangChain and vector search, enabling context-aware responses grounded in course material with sub-2s average latency
- Designed scalable backend with session management, role-based access (student / instructor / admin), and real-time progress tracking via Socket.io; deployed with Docker on DigitalOcean
- Integrated Redis for API response caching and session storage, reducing repeat query load by ~40% and improving page load speed by 30%

Wage Service Platform (Service Marketplace Application) *Stack: Node.js · MongoDB · Socket.io · Google Maps API · JWT · Razorpay*

- Built a full-stack service marketplace (on-demand booking platform) with React Native frontend and Node.js/Express backend; supports 50+ concurrent test bookings with location-based service matching via Google Maps API
- Designed real-time booking state machine (requested → accepted → in-progress → completed) with Socket.io push notifications and live status tracking for both service providers and customers
- Implemented secure REST APIs with JWT authentication, refresh token rotation, and multi-role RBAC (customer, provider, admin); integrated Razorpay payment gateway for end-to-end transactions
- Optimized MongoDB aggregation pipelines for geospatial queries (location radius search), reducing search response time from 800ms to under 200ms via \$geoNear indexing

TECHNICAL SKILLS

Frontend: React.js, Next.js, React Native, JavaScript (ES6+), TypeScript, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, FastAPI (Python), REST APIs, GraphQL, WebSockets (Socket.io)

Databases: MongoDB, PostgreSQL, Redis, Mongoose, Prisma

Auth & Security: Auth & Security: JWT, OAuth 2.0, Role-Based Access Control (RBAC), bcrypt, HTTPS/SSL

AI & LLM: OpenAI API, LangChain, RAG pipelines, Prompt Engineering, LLM integration, Vector Search

DevOps & Cloud: Docker, GitHub Actions (CI/CD), AWS (EC2, S3), DigitalOcean, Linux, Nginx, Vercel

Testing & Tools: Jest (unit testing), Postman, Git, VS Code, Figma, Jira, Notion

Practices: Clean Architecture, Agile/Scrum, Code Review, MVC pattern, RESTful API design

CERTIFICATES

- Certification of Android App Development
- Certification of Web Development
- Certification of MongoDB

LANGUAGES

- English (Professional proficiency)
- Tamil (Native)
